PROFESSIONAL SUMMARY

YouTube analytics and content optimization professional with hands-on experience across YouTube Studio, SEO, thumbnails, titles, long-form content, and Shorts for a cybersecurity brand. Combines performance analysis with editing and design experience to turn CTR, impressions, watch time, retention, and traffic-source signals into practical packaging and content recommendations. Worked across a channel reporting period totaling 1.94M+ views, 30.3K watch hours, and 3.24M impressions.

PROFESSIONAL EXPERIENCE

True Hacking - Marketing Analyst | Jul 2026 - Present

- Monitor YouTube Studio performance across long-form, Shorts, and live content, reviewing CTR, impressions, watch time, audience retention, subscriber response, and traffic sources to identify opportunities and flag performance issues.
- Translate analytics into actionable recommendations for titles, thumbnails, hooks, content structure, SEO/discoverability, and publishing strategy, connecting performance signals with the editing workflow.
- Plan and optimize content strategy across YouTube and short-form distribution, including topics, titles, descriptions, keyword positioning, calls to action, and editorial planning.
- Channel-level performance during tenure: 1.94M+ views, 30.3K watch hours, 3.24M impressions, and 3.4% overall impressions CTR. Results reflect collaborative publishing work during the reporting period.

True Hacking - Video Editor | Jan 2025 - Jul 2026

- Produced long-form YouTube videos and short-form content end to end, shaping hooks, pacing, visual structure, sound, and storytelling for clear, retention-focused viewing.
- Created thumbnails and supported title, description, SEO copy, and format adaptation, linking creative packaging decisions with audience behavior and content goals.
- Worked across Premiere Pro, Photoshop, DaVinci Resolve, and Figma to deliver polished visual assets and multi-format content for YouTube and social channels.

RHI Magnesita - Technical Intern - Data Analysis

- Extracted and analyzed operational data using PI DataLink, PI System Explorer, Microsoft Excel, and Power BI, translating raw metrics into performance studies, technical reports, and decision-support materials.
- Presented findings and collaborated with international technical stakeholders on data-driven improvement work.
